Seeing Numbers Visually

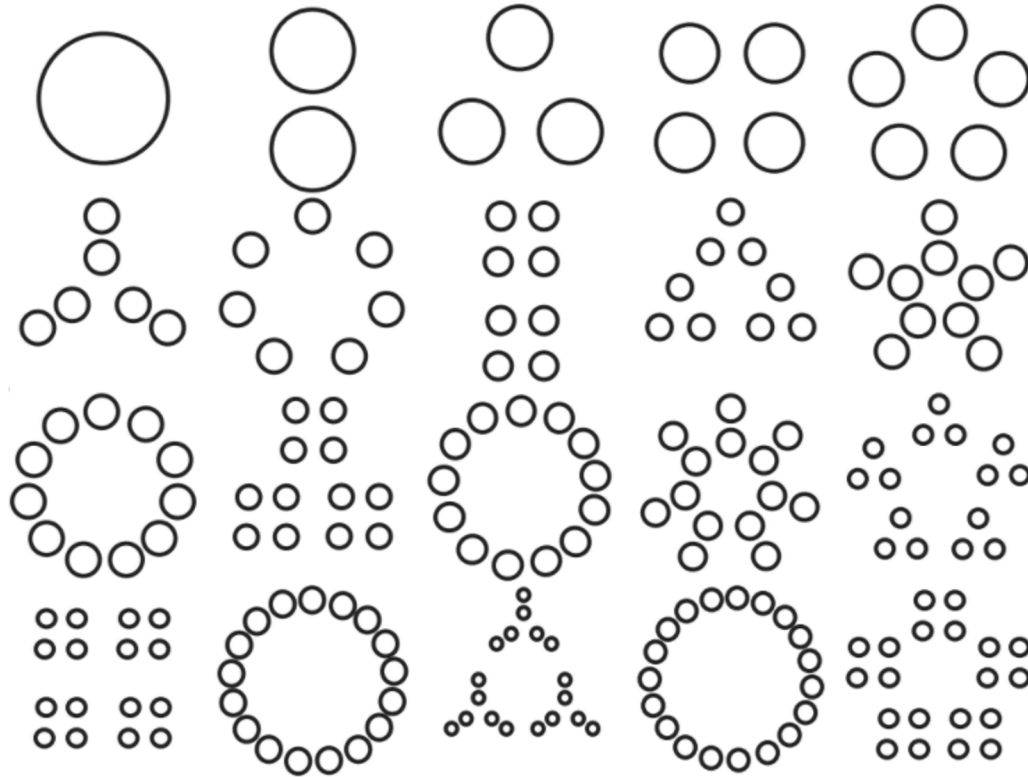

There are different and creative ways to express numbers. Discover patterns in the number visual design and see different ways of combining other numbers to make a different number.

What do you notice in the visual numbers handout?

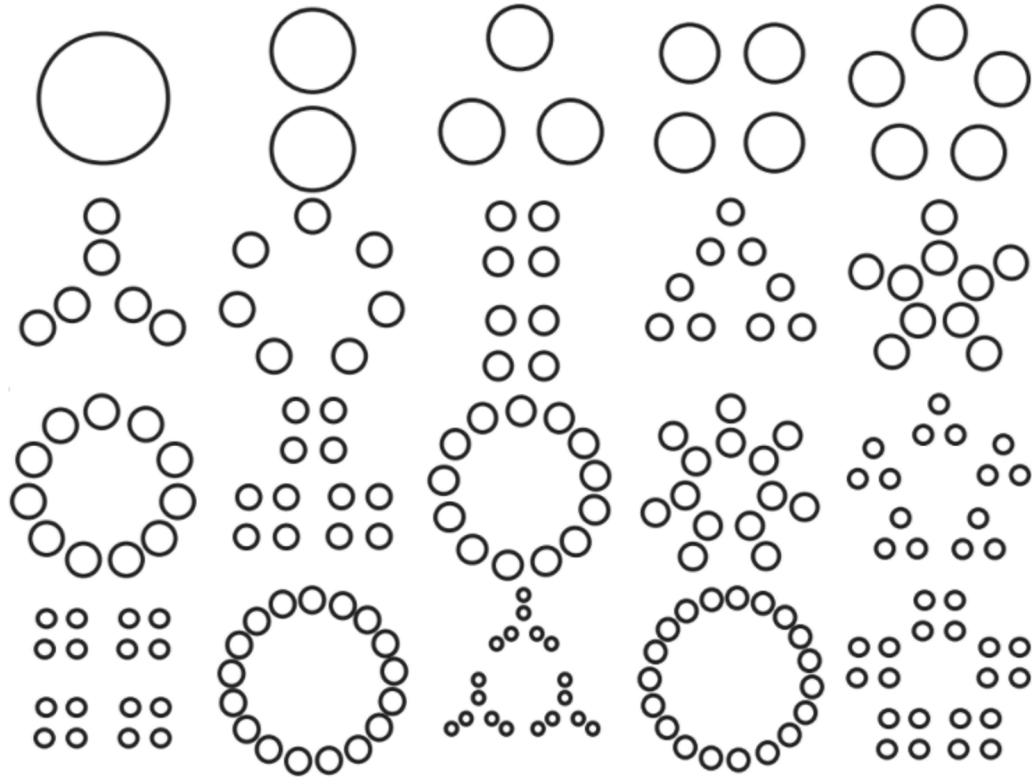

What do you wonder?

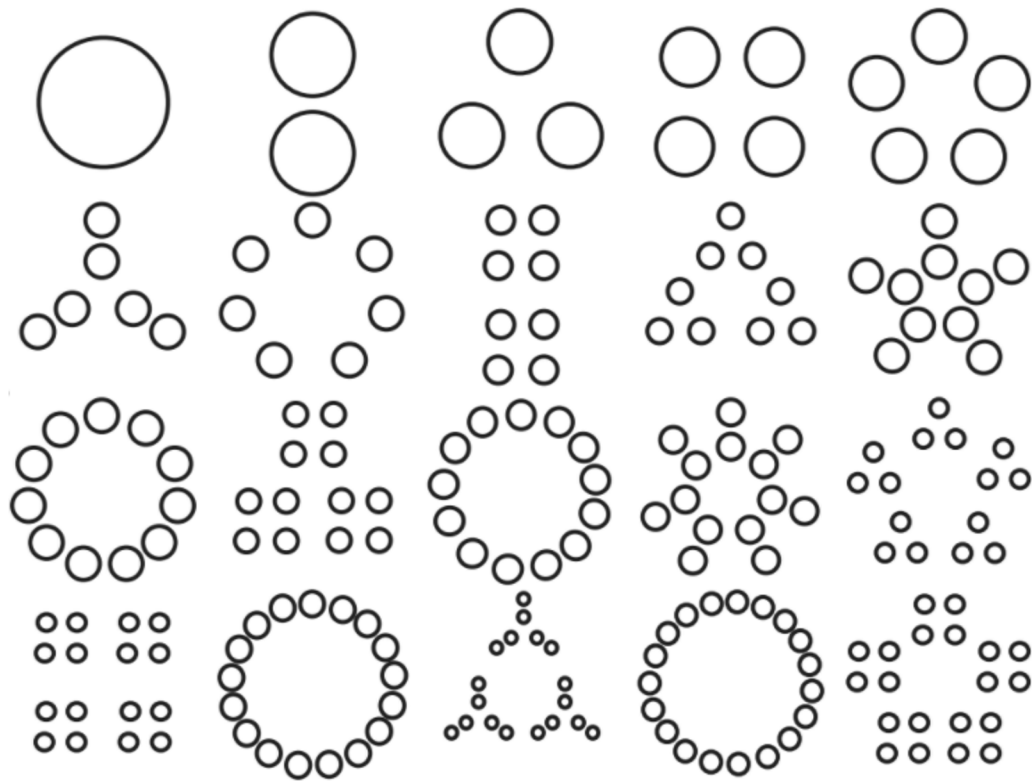

Quick Class Share: What you have noticed or wondered?

Spend more time exploring the numbers and writing or coloring what patterns you see.

Longer Class Share: What patterns do you see?

Debrief

With the whole class, ask how you were able to practice the “speed is not important” from the video we watched.

What did students like about this activity?

What parts were challenging?

How did they grow their brain during this activity?
